

UVA MIRA

— MOUNTAIN VINEYARDS —

Uva Mira Mountain Vineyards, as high as 620 metres above sea level on the slopes of the Helderberg Mountain Range, nestle against the Helderberg Nature Reserve.

With breathtaking views over False Bay and Table Bay, often wrapped in clouds, a cool climate, sea breezes, a granite foundation and strong minerality of the soil, enhanced by acres of fynbos... nature does her work.

— SAUVIGNON BLANC —

Our Sauvignon Blanc vines are planted on the South-Westerly slopes of the Helderberg Mountain range facing False Bay and Table Bay. The early morning breezes cool the vines which contributes to the superb natural acidity in the grapes.

— CHARDONNAY —

"Great wines taste like they come from somewhere. You can't fake somewhere-ness. You can't manufacture it... but when you taste a wine that has it, you know."
Matt Kramer, Making Sense of Wine

— RED WINES —

Uva Mira is located in one of the oldest established red wine producing areas in Stellenbosch, an area often referred to as "The Golden Triangle," recognised for producing outstanding wines.

Our fine wines are handcrafted using only grapes from the vineyard sites on our property, to truly express the unique traits of our remarkable site.

The style of Uva Mira red wines is one of elegance which comes through in every delectable sip.

— UVA MIRA – THE WONDERFUL GRAPE —

Uva is the Latin word for grape.

Mira – means worthy of admiration, wonderful, peaceful, prosperous, astonishing, full of charm and hard to resist. It also shares a cosmic link: the red giant binary star Mira, the most notable star in the Cetus constellation.

Uva Mira is a hidden gem perched against the majestic 5 peaks of the Helderberg Mountain Range.
